you don't,
and that
allows you
to enjoy a
carefree day.**

CERTAS alarm Digital+

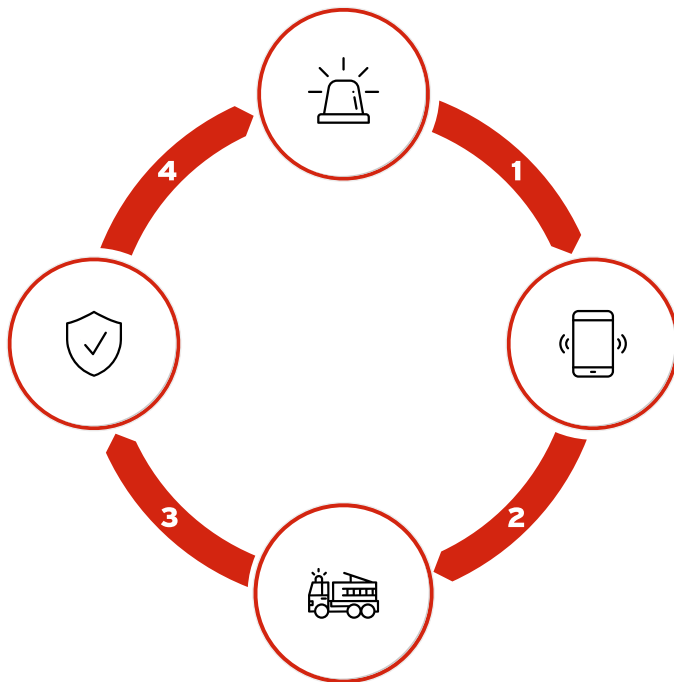

Don't worry. Live safely.

CERTAS ALARM DIGITAL+ / AUTOMATED ALARM NOTIFICATION VIA VOICE MESSAGE

With CERTAS alarm Digital+, you can always rest assured that all necessary measures will be taken in the event of an alarm - at all times and in all circumstances. When an alarm is triggered, our system will automatically call you and play a pre-recorded voice message to inform you about the type of alarm (e.g. robbery or fire alarm) and the affected location. The voice message will prompt you to acknowledge the message by pressing a button, indicating that you have understood the notification. However, the voice message cannot answer any questions. After successful acknowledgement or if the call is not answered, the process will proceed according to the defined instructions. This process will be repeated up to three times. If the voice message is still not acknowledged after the third attempt, or in case of system malfunctions, an employee of the alarm monitoring centre will intervene in the process.

HOW DOES CERTAS ALARM DIGITAL+ WORK?

1. Signal receipt

A hazard warning system sends an alarm signal, e.g. because of a break-in.

2. Alarm

We inform the pre-defined contact person via automated voice message.

3. Intervention

In an alarm situation, every second counts. We take all steps required to intervene as quickly as possible.

4. Controlling

Creating a service report.

CERTAS alarm Digital+ can be precisely tailored to your needs. We would be happy to advise you on a holistic solution to protect everything that is dear and valuable to you in an alarm situation.

YOUR BENEFITS

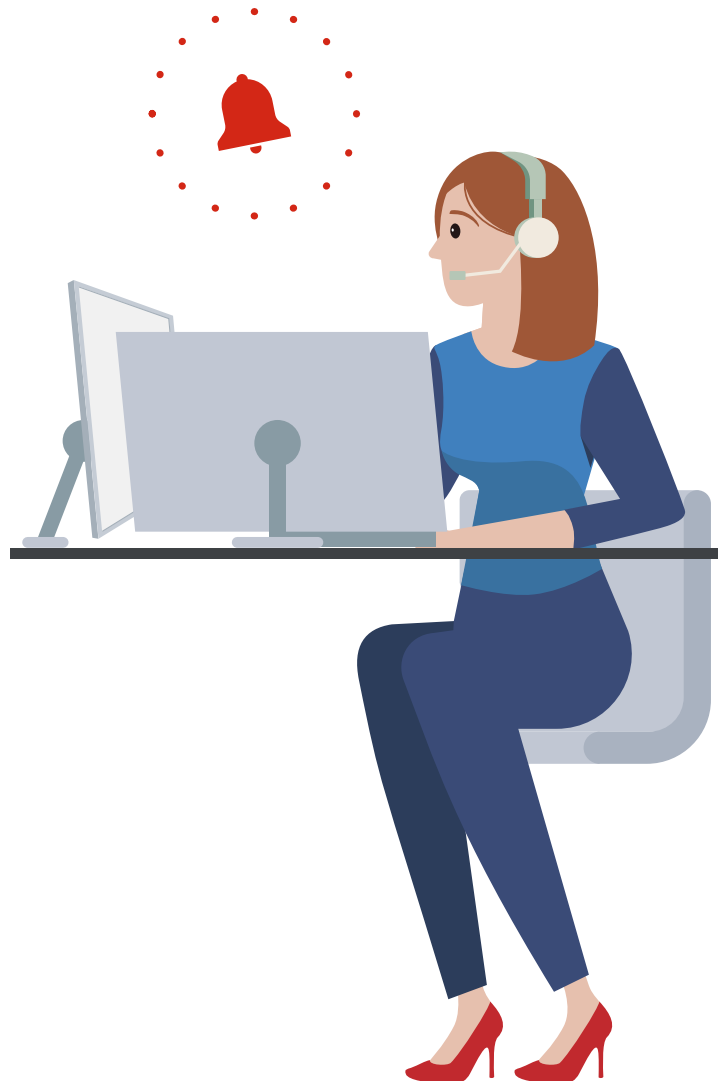

The automated alarm system reacts instantly to any alarm signal and immediately initiates the necessary measures according to your instructions.

With CERTAS alarm Digital+, you enjoy more security and less stress by delegating alarm processing to our automated solution. Because you can't always be on site, an alarm system is only efficient when it is connected with Certas.

If the automated voice message is not acknowledged after three attempts, an employee from the alarm center will intervene in the process.
