you don't,
and it looks
you straight
in the eyes.**

REMOTE MONITORING FOR ALARM VERIFICATION

Our alarm monitoring centre constantly keeps an eye on what is important to you. An alarm does not always signal an emergency. Thanks to video transmission, our alarm centre can verify the severity of the situation in real time – and decide whether further steps are necessary.

HOW DOES CERTAS VIDEO WORK?

1. Alarm signal

An incident such as a break-in or glass breakage will trigger an alarm in the hazard warning system.

2. Verification

Assessment of video material in the alarm monitoring centre and verification of alarm signal. Depending on the situation and instructions, an intervention is triggered.

3. On-site intervention

Mobilising all required private and public intervention forces. If images point to a criminal offence, this can be directly reported to the police.

4. Controlling

Remote monitoring of the intervention and creation of a service report.

YOUR BENEFITS OF THE TWO TRANSMISSION SOLUTIONS FOR VIDEO

Cloud solution

- Simple, flexible cloud
- Cameras of a European brand (Axis)
- Secured with SSL certificate
- Swiss development (cloud in Switzerland)
- Low cost, as no VPN is required

Virtual Private Network (VPN)

- Suitable for high security standards
- Transmission via secured connection
- Security through special hardware
- Plannable due to recurring costs
- Support by exclusive suppliers

YOUR BENEFITS

The evaluation of video footage enables a simplified distinction between a false alarm and a real alarm. False alarms with all their consequences in terms of personnel effort, time and costs can thus be avoided. Frequent false alarms could cause habitual behaviour in the persons alerted. This risk is thus minimised.

Thanks to the video footage, the experienced Certas employees can mobilise the required task forces without first having to send an intervention company to the site for alarm verification. This saves valuable time.

Certas only accesses the cameras after the alert notification has been received. After verification has been completed, visual monitoring is immediately discontinued. We adhere to the applicable Swiss data protection laws and the basic data protection regulations of the European Union.

Video monitoring deters both burglars and persons intending to cause damage to property. The conclusive video footage also makes police work easier and thus contributes to a reduction in crime.
