you don't
see – a
strong team,
and definitely
smart.**

SMART PROCESSING OF ALARMS – IN THE EVENT OF A BREAK-IN, FAULT, FIRE, PANIC AND OTHER ALARM SIGNALS

With CERTAS control IoT, you can take advantage of all the benefits of permanent monitoring in the security section of your Smart Home, Smart Building or Smart City System. In the event of an alarm, all the required measures are taken so that you can relax and concentrate on the important things in life.

CERTAS control IoT is suitable for single people or families, owner-occupied homes, rented flats and companies. All you need is a Smart Home, Smart Building or Smart City System that can be connected to us.

HOW DOES CERTAS CONTROL WORK?

1. Signal receipt

The installation sends an alarm signal, for example when there is a break-in.

2. Alarm

We receive the signal 24 hours a day, 7 days a week, 365 days a year and forward an alarm to the appropriate persons or organisations.

3. Intervention

In an alarm situation, every second counts. We take all steps required to intervene as quickly as possible.

4. Controlling

Creating a service report.

CERTAS control IoT can be tailored to your needs. We would be happy to provide you with comprehensive advice, so that we can protect you and everything that is dear to you in the event of an alarm.

YOUR BENEFITS

Reduce your stress. It is a wise decision to install a Smart Home System for your security. However, the system should not be an additional stress factor. It makes sense to delegate alarm management to professionals. Certas employees know exactly what they need to do.

Depending on the alarm plan, the employee ensures that it is not a false alarm. If they do not receive a response or if an incorrect code is entered, they can call on an intervention force (private, public) to take the necessary measures.

A smartphone is not a good solution for processing alarms 24 hours a day. You will not receive alarm signals if you have no reception, if the battery is flat or if the device is switched to mute. In contrast, we can be reached around the clock.

The mere fact that your alarm system is connected to the Certas alarm centre prevents attempted break-ins and thus increases your security. You will receive stickers from Certas as soon as your connection has been activated, thus deterring potential intruders.
